

Person Verification Transfer Certificate (PVT) - Data Dictionary v1.3

Root Element: personVerificationTransferCertificate

Segment Name: header

Data Element	Obligation	Format	Size	Repetition	Description	Conditions
Segment	Mandatory				1 The header segment contains the type of message, the Health Fund information (both the OLD and NEW Health Fund) and transactional information.	
schemaVersion	Mandatory	N	4	1	The schema version is a two-level number (##.#) that will be used to denote the version of the XML Schema used to validate the XML file, for example 1.0.	
contentType	Mandatory	A	3	1	The type of transaction. PVT = Patient Verification Transfer Certificate	
originFundBrandId	Mandatory	A	3	1	This is the originFundBrandId that is supplied in the associated Transfer Certificate Request (TCR).	
fundBrandId	Mandatory	A	3	1	This is the fundBrandId that is supplied in the associated Transfer Certificate Request (TCR). This will be equivalent to industry Health Fund code for the OLD Health Fund i.e. the Health Fund that is sending the PVT response.	
transactionId	Mandatory	A/N	24	1	The transactionId that is supplied in the associated Transfer Certificate Request (TCR). This is a unique identifier that is allocated by the initiating Health Fund. The transaction ID will be consistent throughout the entire lifecycle of the Transfer Certificate process.	
referenceId	Mandatory	A/N	24	1	The referenceId that is supplied in the associated Transfer Certificate Request (TCR).	
transactionDateTime	Mandatory	Date and Time - offset		1	Date time stamp of the transaction. For example 2016-05-30T09:30:10-06:00	
requestDateTime	Mandatory	Date and Time - offset		1	The TransactionDateTime that is supplied in the associated Transfer Certificate Request (TCR). For example 2016-05-30T09:30:10-06:00	

Segment Name: persons

Data Element	Obligation	Format	Size	Repetition	Description	Conditions
Segment	Mandatory			1	The persons segment contains the verification response from the old Health Fund for each person sent through on the associated Transfer Certificate Request (TCR).	
person					Refer to Segment Name: person	

Segment Name: person

Data Element	Obligation	Format	Size	Repetition	Description	Conditions
Segment	Mandatory			n	The person segment contains the response for each individual person.	A person segment must be sent for every person received in the associated Transfer Certificate Request (TCR).
requestId	Mandatory	N	2	1	The sequence ID of the person, as per the associated Transfer Certificate Request (TCR).	The person requestId must match that sent in the associated Transfer Certificate Request (TCR) in order to link the person information between the request and response transactions.
healthFundResponse					Refer to Segment Name: healthFundResponse	

Segment Name: healthFundResponse

Data Element	Obligation	Format	Size	Repetition	Description	Conditions
Segment	Mandatory			1	One response is required for each person	
responseCode	Mandatory	N	4	1	The response code that indicates whether or not the person is known to the OLD Health Fund. The Valid codes for a PVT are: 0000 - Person known at Fund 9663 - Membership number not recognised by Health Fund 9667 - Person not recognised on the membership 9668 - Cover for the person does not match 9689 - No person GivenName, FamilyName, DOB OR Gender match 3007 - Invalid xml	The response code must be one that is defined in the standardised list of response codes for Transfer Certificate transactions.
responseText	Mandatory	A/N	80	1	The response text to complement the response code as defined by the standardised list of response codes.
